

Made of thick, black weather and water-resistant Cordura nylon, the 15lb **Impact Saddle Sandbag** is a staple in studios or on location for stabilizing light stands, booms, tripods, and backgrounds. The bag features rugged and durable assembly throughout. A double-zipper design is employed to safely contain its sand and allow its removal, if necessary, as well as a webbed handle for hanging or moving.

FEATURES

Saddle-Style Sandbag - The two-winged saddle sandbag is designed to conform to studio equipment such as light stands, tripods, backgrounds, or other equipment that needs support and stabilization

Sturdy Handles - Strong top and bottom handles made with nylon webbing offer options for providing a counterweight to boom arms and make transporting the sandbag easy

Durable Weather and Water Resistant Cordura - The sandbag is made with thick Cordura nylon fabric that will withstand repeated use in the most demanding environments, whether it's in the studio or on location. Cordura is also weather and water resistant, so it will stand up to the elements and keep the contents dry.

Double-Zipper - The double-zipper design ensures that the contents of the bag do not spill out
